Solution Paths

CONFIDENTIAL - there is no single correct answer

Client	Generation Bridge Foundation
Document reference	Facilitator pack
Classification	FACILITATOR ONLY - do not distribute
Version	3.0 | July 2026

Reward reasoning, not a particular destination. Strong teams name what their preferred path costs. Weak answers pick one slogan and ignore the evidence against it.

Path A - Depth before scale

Thesis: Pause expansion, fix Dong Nai and employer quality, negotiate a smaller quality-focused VPBank grant.

Strengths: Honest about D-02; addresses EP-02 and ST-05; sustainable.

Risks to probe: May leave money on the table; must convince VPBank (see DN-01).

Path B - Conditional scale (most common strong answer)

Thesis: Accept VPBank but gate expansion behind quality milestones; fix Dong Nai first, then Long An.

Strengths: Balances DN-01 and BD-01; keeps the grant; stages risk.

Risks to probe: Execution-heavy; needs credible M&E to hold the line.

Path C - Employer-led pivot

Thesis: Certify and audit employers; place only with vetted partners; make quality the brand.

Strengths: Directly answers EP-02, ST-05, BN-02; differentiates from YouthWorks.

Risks to probe: Slower growth; needs employer buy-in.

Path D - Digital hybrid

Thesis: Grow Pathway Digital for reach, keep Skills Forward for depth.

Strengths: Lower unit cost (D-12); serves waitlist faster.

Risks to probe: Digital placement is weaker; equity risk (BN-01 has no laptop); only valid with caveats.

Red lines (mark down if crossed)

- Recommending 60-day reporting as the primary metric to look better.
- Replacing caseworkers with volunteers (contradicts VR-01).
- National scale with no fix for Dong Nai.
- Cherry-picking easier-to-place youth without acknowledging the cost.
- Workflow A citing 'the dataset' without Request / Findings IDs.
- Workflow B sharing the raw workbook with A.
