

Solution Paths

CONFIDENTIAL - there is no single correct answer

Client	Generation Bridge Foundation
Document reference	Facilitator pack
Classification	FACILITATOR ONLY - do not distribute
Version	3.1 July-September 2026

Reward reasoning, not a particular destination. Strong teams name what their preferred path costs. Weak answers pick one slogan and ignore the evidence against it.

Path A - Depth before scale

Thesis: Pause expansion, fix Dong Nai and employer quality, negotiate a smaller quality-focused VPBank grant.

Strengths: Honest about D-02; addresses EP-02 and ST-05; sustainable.

Who is left behind: The ~1,100 on the waitlist (esp. Binh Duong / BN-04, YouthWorks leakage); Long An ambition and the Board growth faction; possibly part of the VPBank envelope if renegotiated down.

Risks to probe: May leave money on the table; must convince VPBank (see DN-01).

Path B - Conditional scale (most common strong answer)

Thesis: Accept VPBank but gate expansion behind quality milestones; fix Dong Nai first, then Long An.

Strengths: Balances DN-01 and BD-01; keeps the grant; stages risk.

Who is left behind: Whoever sits behind the gates - waitlisted youth until milestones clear; Long An if gates stay closed; young people who need help now while process/M&E work runs. Soft risk: staff burn if 'fix in parallel'.

Risks to probe: Execution-heavy; needs credible M&E to hold the line.

Path C - Employer-led pivot

Thesis: Certify and audit employers; place only with vetted partners; make quality the brand.

Strengths: Directly answers EP-02, ST-05, BN-02; differentiates from YouthWorks.

Who is left behind: Youth who would have taken weaker/exploitative placements; hubs dependent on volume employers (DN); anyone facing fewer seats / longer waits; employers who fail audit and the youth they would have absorbed.

Risks to probe: Slower growth; needs employer buy-in.

Path D - Digital hybrid

Thesis: Grow Pathway Digital for reach, keep Skills Forward for depth.

Strengths: Lower unit cost (D-12); serves waitlist faster.

Who is left behind: Youth without devices/connectivity (BN-01); people who need in-person support (disability / weaker digital skills - BN-03); anyone steered to Digital who would have done better on Skills Forward. Waitlist may shrink on paper while equity worsens.

Risks to probe: Digital placement is weaker; equity risk (BN-01 has no laptop); only valid with caveats.

Across all four (if unnamed): disability, Dong Nai youth in bad internships, and anyone cherry-picked to protect 65% remain red-line 'left behind' groups.

Red lines (mark down if crossed)

- Elevating a shorter-than-ninety-day placement window (e.g. 60-day) as the primary metric to look better (watch for 'earlier visibility' language from Development).
- Replacing caseworkers with volunteers (contradicts VR-01).
- National scale with no fix for Dong Nai.
- Cherry-picking easier-to-place youth without acknowledging the cost.
- Treating D-08 board emails as verified fact.
- Claiming attendance causes placement without naming confounders.
- Workflow A citing 'the dataset' without Request / Findings IDs.
- Workflow B sharing the raw workbook with A.
