

Workflow A - Impact Strategy

Engagement brief and requirements

Client	Generation Bridge Foundation
Document reference	MOM-2026-WSA-01
Classification	Participant material - Workflow A
Version	3.1 July-September 2026

Purpose of this workflow

Workflow A owns direction. You make sense of what stakeholders say, frame the problem, decide which questions matter, develop strategic options, and build the story the Board will hear. Workflow B holds the operational record. You cannot look the numbers up yourself; you must ask.

Hard constraint on data

You do not have access to GBF_Datasets.xlsx or the data dictionary. Do not ask facilitators for those files. You will receive a Data Estate Brief from B (what exists, in plain language) - not the raw file. When you need a quantitative answer, file a Demand Brief, then formal Analysis Requests. Working out what to ask is part of the exercise. Vague demands get vague plans.

How the exchange with B works

B is not idle while you frame. In Weeks 1-3 they profile and clean the export, write a Data Estate Brief for you, and build a working dashboard. Your job in Week 3 is to read that brief, file a Demand Brief (ranked decision needs from your A1 hypotheses), then file precise R-xx requests. B responds with an Analysis Plan (they own the method) and Findings Memos. Do not delay Demand / R-01 until options are finished - B needs early demand to plan.

Your responsibilities

- Synthesise interview transcripts into clear, cited insights.
- Frame the problem with a MECE issue tree and testable hypotheses.
- Read B's Data Estate Brief; file a Demand Brief that states what you need for the Board decision (not column names).
- File Analysis Requests that turn Demand items into concrete R-xx asks.
- Ground recommendations in specific voices from the transcripts.
- Develop two or three strategic options and a single recommendation.
- Sit with the costs of your preferred choice (trade-off reflection).
- Own the executive summary and the narrative of the board presentation.

Deliverables, owners and deadlines

#	Deliverable	Template	Due
A1	Problem statement and issue tree	Templates/Problem_Statement_and_Issue_Tree.docx	Wed 5 Aug
A1b	Stakeholder map	Templates/Stakeholder_Map.docx	Thu 6 Aug
C	Information credibility matrix (shared)	4_Shared_Toolkit/Templates/Information_Credibility_Matrix.docx	Thu 6 Aug
DMD	Demand Brief (to Workflow B)	4_Shared_Toolkit/Templates/Demand_Brief.docx	Tue Week 3
A2	Interview synthesis	Templates/Interview_Synthesis.docx	Wed 12 Aug
A3	Empathy and journey maps	Templates/Empathy_and_Journey_Map.docx	Wed 12 Aug

R	Analysis Requests (minimum three)	4_Shared_Toolkit/Templates/Analysis_Request.docx	Weeks 3-5
A4	Strategic options	Templates/Strategic_Options.docx	Thu 20 Aug
A5	Trade-off reflection	Templates/Tradeoff_Reflection.docx	Wed 26 Aug
A6	Validation protocol (with WF-B)	Templates/Validation_Protocol.docx	Wed 26 Aug
A7	Recommendation revision log	Templates/Recommendation_Revision_Log.docx	Thu 27 Aug

Detailed requirements

A1 - Problem statement and issue tree.

- Write a precise problem / decision statement in your own words. Do not copy the engagement letter. The Board hired you partly to frame the decision.
- Build an issue tree that is mutually exclusive and collectively exhaustive. Invent the branches from the evidence - the template does not prescribe them.
- Write at least four hypotheses. Each hypothesis should imply a question you could ask Workflow B.

Demand Brief and Analysis Requests.

- Wait for B's Data Estate Brief before locking Demand - use it to aim asks, not to invent field names.
- File the Demand Brief in Week 3 with ranked decision needs linked to A1 hypotheses. Demand is 'what would change the recommendation', not 'send columns'.
- Before final options, complete at least three requests with Findings Memos returned.
- File R-01 once Demand and B's Analysis Plan for that item exist - do not wait for a polished deck.
- Each request states: the decision it informs, the hypothesis, what a useful answer would look like, and urgency. Do not prescribe field names you have not been given.
- Ask what would change your mind - not everything that looks interesting. Use the official templates; chat messages are not the record.
- Cite Request IDs (R-01, R-02...) on every quantitative claim in A4 and later.
- Save DEB, Demand, Plans, Requests and Memos as PDF in A_B_Exchange/ (see Programme Guideline). Markers assess the exchange from that folder.

A2 - Interview synthesis.

- Summarise by theme, not by person. Flag contradictions between sources.
- Every insight cites at least one transcript reference.

A3 - Empathy and journey maps.

- Choose one beneficiary archetype grounded in BN-01 to BN-04.
- Map the journey from awareness to a job at ninety days. Attach a quote or a Findings Memo cite to each major pain point.

A4 - Strategic options.

- Present two or three genuinely different options.
- For each: rationale, cost implication (from B), main risks, who wins and loses.
- Recommend one. State what would change your mind.

A5 - Trade-off reflection.

- Answer the open prompts in the template honestly. There is no checklist of named dilemmas to tick off.
- Make clear what your recommendation costs - and for whom.

How Workflow B will challenge you

Before you submit strategic options or final board materials, Workflow B will check that every

number cites a Request or Findings ID, that options are financially realistic, and that you have not ignored uncomfortable findings. Those gated submissions also require their online confirmation on the handoff checklist (Guideline Section 8).
