

## Workflow B - Operations & Analytics

### Engagement brief and requirements

|                    |                                   |
|--------------------|-----------------------------------|
| Client             | Generation Bridge Foundation      |
| Document reference | MOM-2026-WSB-01                   |
| Classification     | Participant material - Workflow B |
| Version            | 3.1   July-September 2026         |

### Purpose of this workflow

Workflow B owns the operational evidence. You hold the datasets and the data dictionary. You clean, analyse, and translate findings into language Workflow A can use. Success is not a dump of pivots; it is a clear answer to a question A actually asked - delivered fast because you prepared the data before the ask arrived.

### Hard constraint on sharing

Do not share GBF\_Datasets.xlsx or the data dictionary with Workflow A. You may share a Data Estate Brief (catalog in plain language), an Analysis Plan (how you will answer), Findings Memos and curated charts. If A asks for 'the file', refuse and ask what decision the number needs to support.

### Three modes of work (do not wait idle)

You do not need A's permission to understand the data. You do need Demand / Requests before you push decision numbers into A's narrative.

| Mode                         | When          | What you do                                                                                                                   |
|------------------------------|---------------|-------------------------------------------------------------------------------------------------------------------------------|
| Foundation (proactive)       | Weeks 1-3     | Read the dictionary; profile and clean (B1 / DB-1); write the Data Estate Brief for A; build a working dashboard (B2 / DB-2). |
| Planning (proactive + joint) | Week 3 onward | Read A's Demand Brief; write Analysis Plans you own; then answer formal R-xx with Findings Memos.                             |
| Challenge (joint)            | Weeks 4-6     | Evidence-check A's options (B4); run funding scenarios (B5) once options exist.                                               |

If no Demand Brief has arrived by mid-Week 3, nudge A. Do not invent a strategy for them - ask what decision is stuck. Do not dump the dictionary on A instead of a proper Data Estate Brief.

### Your responsibilities

- Own and apply the data dictionary; profile and clean the export.
- Brief A with a Data Estate Brief (catalog / limits - never the raw workbook).
- After A's Demand Brief, write Analysis Plans that show how you will answer.
- Maintain the Request Log; answer Analysis Requests on time with Findings Memos.
- Translate findings into plain language with caveats and definitions.
- Build a working dashboard (B only) and pull curated charts into Findings Memos.
- Model funding scenarios behind any recommendation A is considering, including staff, mentor and finance capacity (hub\_capacity\_jan2026).
- Give an honest assessment of placement under clear definitions.
- Maintain the assumption log, risk register and version control.

### Deliverables, owners and deadlines

| #   | Deliverable                       | Format                                                   | Due        |
|-----|-----------------------------------|----------------------------------------------------------|------------|
| DEB | Data Estate Brief (to Workflow A) | 4_Shared_Toolkit/Templates/Data_Estate_Brief.docx -> PDF | Mon Week 3 |

|    |                                              |                                               |             |
|----|----------------------------------------------|-----------------------------------------------|-------------|
| B1 | Data quality report (internal to B)          | Templates/Data_Quality_Report.docx -> PDF     | Tue 11 Aug  |
| AP | Analysis Plans (linked to Demand / R-xx)     | 4_Shared_Toolkit/Templates/Analysis_Plan.docx | From Week 3 |
| FM | Findings Memos (responses to R-01+)          | 4_Shared_Toolkit/Templates/Findings_Memo.docx | From Week 3 |
| B2 | Performance dashboard (working file)         | GBF_Performance_Dashboard.xlsx                | Fri 14 Aug  |
| B3 | Analysis summary (tied to Requests answered) | Templates/Analysis_Summary.docx -> PDF        | Wed 19 Aug  |
| B4 | Evidence-check memo on A's options           | Templates/Evidence_Check_Memo.docx -> PDF     | Fri 21 Aug  |
| B5 | Funding scenarios                            | Toolkit workbook, 'Funding Scenarios' tab     | Thu 27 Aug  |

## Analysis backlog

DB-1 and DB-2 are mandatory foundation. The Data Estate Brief is how A learns what you hold without seeing the file. Everything else follows Demand: when A states a decision need, you write the Analysis Plan, then analyse, then return a Findings Memo. If you are unsure how to approach a demand, ask your Buddy for coaching questions - not for the answer.

DB-1 - Data quality audit (foundation).

- Profile every table for missing values, duplicates and format problems.
- Use WSB\_Data\_Dictionary.pdf as your field guide. Investigate anomalies; do not delete silently.
- Record every cleaning decision in the assumption log. Share with A only the material issues that affect a decision (via Findings Memo), not the full cleaning log.

DB-2 - Performance dashboard (foundation).

- Use pivot tables to show placement by hub, programme and gender.
- Flag any rate that looks material under the definition you state.
- Keep this as a B working file. Export only curated views into Findings Memos when A asks.

On-request analysis (no fixed recipe).

- After A's Demand Brief, write an Analysis Plan you own, then answer each formal R-xx with a Findings Memo in A\_B\_Exchange/.
- Your job: restate their decision question, choose tables from the dictionary, compute carefully, state definitions and caveats.
- Write Analysis Plans against Demand (before R-xx). Do not invent Plans with no Demand, and do not share raw tables. If stuck on method, ask Buddy - they will nudge, not solve.
- Chat acknowledgements are fine; the assessable answer is the FM-xx PDF.

Funding scenarios (after draft options).

- Run once A has sketched options or asks what growth costs (deliverable B5). Stress-test each scenario against mission fit, Board ambition, and internal capacity (staff FTE, mentors, monthly burn) - not cost alone.
- Use audited costs (D-12) and funder terms (D-03); state every assumption.
- Judge whether each scenario can meet placement conditions under an honest definition you state.

## How Workflow A will challenge you

Before gated submissions (options, final report, board pack), Workflow A will check that you answered their questions in plain language, that you did not share the raw file, that definitions and caveats are stated, and that unanswered requests are logged. Those submissions also require their online confirmation on the handoff checklist (Guideline Section 8).
