

Presentation & Storytelling Guide

How to present to the GBF Board

Client	Generation Bridge Foundation
Document reference	MOM-2026-ST-01
Classification	Participant material - shared
Version	3.1 July-September 2026

The one rule

Every slide answers a single question, and its title states the answer. Build each slide as: headline (the answer), then evidence, then the insight, then the implication or recommendation.

What to avoid

Instead of this	Do this
A slide titled 'Data analysis'	A slide titled with the insight, e.g. what the evidence forces the Board to face
Twelve numbers on one chart	One chart making one point
A decorative stock photo	White space and one piece of evidence
Eight bullet points of recommendations	One recommendation per slide
Ending on 'thank you'	Ending on the decision you need from the Board

An eight-slide structure (matches the board deck template)

- Slide 1: Your recommendation in one sentence - The single most important message
- Slide 2: What is at stake - Why the Board cannot postpone the decision
- Slide 3: What the evidence forces you to confront - One hard finding, cited
- Slide 4: Where definitions or data change the story - Measurement honesty without a lecture
- Slide 5: The options we weighed - Two or three, with trade-offs
- Slide 6: Our recommendation - The choice and its theory of change
- Slide 7: How it would be delivered - A ninety-day roadmap
- Slide 8: The decision we need today - Two or three specific asks

Keep detailed methodology, hub comparisons and full financials in an appendix. Cite Request IDs on any slide that quotes an operational number. Do not open with a restatement of the engagement letter - open with your recommendation.
