

Data Task Solutions

CONFIDENTIAL - expected findings and pitfalls

Client	Generation Bridge Foundation
Document reference	Facilitator pack
Classification	FACILITATOR ONLY - do not distribute
Version	2.0 July 2026

DB-1 Data quality - what they should find

- Duplicate beneficiary IDs (built in) - de-duplicate before counting.
- placed_90d coded as Y/Yes/1/N/No/0/blank - normalise.
- Mixed date formats across tables.
- A wage outlier (obvious typo) on one record.
- Dong Nai Q3 costs double-entered in hub_costs_2025.
- Hours logged against an inactive mentor in volunteer_hours.
- 'HCMC' vs 'Ho Chi Minh City' inconsistency.

DB-2/DB-3 expected patterns

- Dong Nai placement clearly below HCMC hubs.
- Formal-only rate roughly 8 points below the broad rate (aligns with ST-02).
- Higher attendance associates with placement - but confounded by transport/motivation.
- Disability placement materially below overall (aligns with ST-03).

DB-4 / DB-5

- Mentor hours weakly associate with completion; do not overclaim causation.
- Aggressive growth struggles to hold 65% honestly without cherry-picking - the ED-01 tension.
