

Presentation & Storytelling Guide

How to present to the GBF Board

Client	Generation Bridge Foundation
Document reference	MOM-2026-ST-01
Classification	Participant material - shared
Version	2.0 July 2026

The one rule

Every slide answers a single question, and its title states the answer. Build each slide as: headline (the answer), then evidence, then the insight, then the implication or recommendation.

What to avoid

Instead of this	Do this
A slide titled 'Data analysis'	A slide titled 'Dong Nai trails every hub on placement'
Twelve numbers on one chart	One chart making one point
A decorative stock photo	White space and one piece of evidence
Eight bullet points of recommendations	One recommendation per slide
Ending on 'thank you'	Ending on the decision you need from the Board

A ten-slide structure

- Slide 1: Your recommendation in one sentence - The single most important message
- Slide 2: Demand has outpaced funding - Waitlist and budget trend
- Slide 3: Why young people drop out - A beneficiary quote plus the transport data
- Slide 4: The real placement picture - Formal versus broad definition
- Slide 5: Where performance differs - Hub or programme comparison
- Slide 6: The options we weighed - Two or three, with trade-offs
- Slide 7: Our recommendation - The choice and its theory of change
- Slide 8: How it would be delivered - A ninety-day roadmap
- Slide 9: The ethics we are not ducking - One dilemma, resolved honestly
- Slide 10: The decision we need today - Two or three specific asks

Keep detailed data, methodology and full financials in an appendix.
