

Data Dictionary

Operational export held by Workflow B

Client	Generation Bridge Foundation
Document reference	MOM-2026-WSB-DD
Classification	Workflow B only - do not share with Workflow A
Version	3.0 July 2026

This dictionary describes the eight tables in GBF_Datasets.xlsx. It is for Workflow B only. Do not forward this file or the workbook to Workflow A.

Tables

Table	Approx. rows	Purpose
beneficiary_registry	520	Master list of young people in the export
employment_outcomes	460	Employment status ~90 days after completion
programme_attendance	3,700	Session-level attendance
survey_outcomes_2025	350	End-of-programme satisfaction survey
volunteer_hours	1,050	Mentor hours logged
hub_costs_2025	60+	Monthly operating costs by hub
funding_by_source	48	Quarterly income by funder
geographic_waitlist	24	Waitlist by district (Jan 2026 snapshot)

Key fields

Field	Notes
beneficiary_id	Primary join key across tables; check for duplicates
placed_90d	Placement flag; coding may be inconsistent across rows
employment_type	Formal vs Gig - definition choice changes the rate
province / hub	Geography labels may not be standardised
date fields	Expect mixed formats
wage_vnd_monthly	Investigate outliers before averaging
disability_status	Missing values exist; treat carefully
amount_vnd_m	Funding amounts; watch for non-numeric cells

Known data-quality risks

The export contains genuine quality problems. Expect duplicates, mixed coding, format issues, at least one impossible age, at least one wage typo, possible double-entered costs, and mentor hours logged against inactive status. Find them, document your handling, and decide what Workflow A needs to know.

Sample vs organisation totals

This export (~520 beneficiaries) is smaller than the 2,847 figure in D-01. State that limitation whenever you report rates. Do not silently extrapolate.
