

Team Roles & Ways of Working

Shared reference for the whole team

Client	Generation Bridge Foundation
Document reference	MOM-2026-TR-01
Classification	Participant material - shared
Version	3.0 July 2026

Role assignments also appear in 00_Programme_Guideline.pdf (Section 4) so you can set them in Week 1 without opening this file. This page adds ways of working and anti-free-riding rules.

Suggested roles

Role	Count	Owns
Engagement Lead	1	Timeline, board narrative, final integration, Request Log health
Workflow A Lead	1	Issue tree, options, trade-off reflection, Analysis Requests
Research Lead	1	Interview synthesis, credibility matrix, validation
Workflow B Lead	1	Data dictionary, cleaning, Findings Memos, dashboard
Operations Analyst	1	Funding scenarios, cost analysis
Project & Quality Lead	1	Minutes, version control, handoff checklist, file naming

In a team of five, combine the Research Lead with the Workflow A Lead.

Preventing free-riding

- Every deliverable has exactly one accountable owner in the RACI.
- Each member speaks at the board presentation.
- A must file requests; B must answer them - neither can do the other's job.
- The time tracker is reviewed every Friday; peer evaluation is confidential.

Decision-making

Decide by consensus where you can. Where you cannot, the Engagement Lead decides and the disagreement is recorded in the decision log. Cross-workflow handoff confirmation (online tick) is required before anything leaves the team.

Fonts for Vietnamese

Use Nunito (body) or Lexend (headings) in Word and PowerPoint so Vietnamese text does not break. Lora is acceptable for long-form narrative if preferred.
