

Data Task Solutions

CONFIDENTIAL - expected findings and coaching methods

Client	Generation Bridge Foundation
Document reference	Facilitator pack
Classification	FACILITATOR ONLY - do not distribute
Version	3.1 July-September 2026

Workflow B should find these. Workflow A should learn material issues only through Findings Memos, not by opening the workbook. Participant packs no longer include step-by-step DB-3/DB-4 recipes - Buddies coach method; this file holds the key.

DB-1 Data quality - what B should find

- Duplicate beneficiary IDs (built in) - de-duplicate before counting.
- placed_90d coded as Y/Yes/1/N/No/0/blank - normalise.
- Mixed date formats across tables.
- A wage outlier (obvious typo) on one record.
- Dong Nai Q3 costs double-entered in hub_costs_2025.
- Hours logged against an inactive mentor in volunteer_hours.
- 'HCMC' vs 'Ho Chi Minh City' inconsistency.

DB-2 expected patterns (foundation dashboard)

- Dong Nai placement clearly below HCMC hubs.
- Formal-only rate roughly 8 points below the broad rate (aligns with ST-02).
- Disability placement materially below overall (aligns with ST-03).

When A asks about placement drivers / attendance / programme design

Coach B toward this path only if stuck (do not hand A the recipe):

1. Normalise attendance coding in programme_attendance (Y/N/1/0).
 2. Pivot to one attendance rate per beneficiary_id.
 3. XLOOKUP (or join) placement from employment_outcomes.
 4. Compare average attendance for placed vs not placed.
 5. Findings Memo must name confounders (e.g. transport, motivation) - association is not causation.
- Expected pattern: higher attendance associates with placement, but confounded.

When A asks about mentoring / completion / volunteer capacity

Coach B toward:

1. Total mentor hours per young person from volunteer_hours.
 2. Exclude or flag hours logged against inactive mentors before averaging.
 3. Compare completers vs those who withdrew; do not overclaim.
- Expected pattern: mentor hours weakly associate with completion.

Funding scenarios (B5)

- Aggressive growth struggles to hold 65% honestly without selection pressure - the efficiency/ethics tension teams should discover.
